

Scosche reqKASE – Bike Case & Mount for iPhone 5 Available Now

OXNARD, CALIF. – March 7, 2013 – Casual cyclists looking for an easy way to access their fitness apps or music while they ride need look no further than Scosche’s reqKASE for iPhone 5 (also available for iPhone 4 & 4S). The lightweight bike case and mount is made from durable silicone and features an adjustable strap to securely mount an iPhone 5 to handlebars or a bike’s frame.

reqKASE can be mounted vertically or horizontally and features a notch system to secure reqKASE at any width - ensuring that the mounted iPhone won't move or spin while riding. The durable mount keeps the iPhone protected without hindering the ability to operate the device. The headphone jack, speakers, mute switch and forward facing camera all remain open for use. Volume controls are covered for protection but are still easy to operate with the reqKASE on.

reqKASE is the perfect accessory for use with Scosche’s RHYTHM pulse monitor, providing riders with a visual display of their pulse, calories burned, time, speed, and distance traveled all in real time. The RHYTHM works with Scosche’s free RHYTHM app as well as other notable fitness apps like Digifit, iBiker, iCardio and MyFitnessPal.

The new case will also be compatible with Scosche’s boomBOTTLE, due out in April. The wireless omnidirectional outdoor speaker with weatherproof housing is designed to fit in most water bottle cages for streaming music while biking. boomBOTTLE’s built-in rechargeable lithium-ion battery provides up to 10 hours of continuous playback on a single charge.

reqKASE is available at www.scosche.com for \$24.99 and at other fine retailers nationwide.
