

Scosche Announces Limited-Edition, Camo-Inspired RH656M On-Ear Headphones

A stunning mastery of high-end audio specifications with a stylish, camo design, available now for a limited time only

OXNARD, Calif. – September 18, 2013 – [Scosche Industries](#), an award-winning innovator of consumer technology, gets fashionable with fatigues by offerings its popular RH656M on-ear headphones in limited-edition digital camouflage. Coupling Scosche’s over-the-top specs with an under-the-radar look, these headphones offer users a beautifully balanced listening experience and a unique aesthetic.

“The camo-inspired headphones are a fun, new take on our popular RH656M model,” says Kas Alves, Executive Vice President of Scosche Industries. “However, you’ll still experience the same Scosche standards: powerful drivers, a delicate sonic balance and only the best materials.”

The RH656M-Camo reference grade headphones are equalized to create highs, mids, and lows that complement each other for an unparalleled musical experience with any genre of music. Powered by 40mm drivers that feature a custom blend of mylar for a virtually weightless audio membrane, listeners will enjoy flawless sound anytime and anywhere they want to immerse themselves in their favorite tunes. Additionally, copper voice coils and rare earth neodymium magnets deliver accurate musical reproduction.

An angled 3.5mm connector provides optimal strain relief and an extremely low contact resistance for impeccable signal transfer. The RH656M-Camo utilizes tapLINE III remote and mic allowing users to play/pause tracks, adjust volume, activate voice control and enjoy hands-free calling.

Now, you can listen even longer with the RH656M-Camo because of its choice of fine materials. Viscoelastic memory foam softens with body heat allowing it to conform to the listener's unique ear shape for maximum comfort. Each ear cushion completely envelopes the ear, sealing in the music.

The limited edition RH656M-Camo is available now for \$99.99 at www.scosche.com.
