

Kwik Plug

PRELIMINARY INTRODUCTION

The **Kwik Plug** is a quick release power connection for your amplifiers and active bass enclosures. The high-quality ABS plastic and gold plated terminals allow the **Kwik Plug** to be extremely durable and hard-wearing. Capable of taking up to 8AWG cable.

INSTRUCTIONS

Using a size 3 Allen key loosen the hex screws on the Kwik Plug and make the necessary connections. Ensure that the connection marked *AMPLIFIER* is connected to the amplifier and that the side marked *POWER* is connected to the power source. Once properly wired, tighten the hex screws then connect both ends of the Kwik Plug together. **Note: Amplifier wires not included**
